Mackinac Island Carriage Tours has a rich history on Mackinac Island.

Carriagemen officially began providing tours of the Island in 1869 when the first city carriage license was issued. In 1948, the carriagemen officially established Mackinac Island Carriage Tours, Inc.

The founders of Mackinac Island Carriage Tours have had a very prominent role in making Mackinac Island Michigan's most popular tourist attraction. It was the carriagemen, led by their president, Thomas Chambers, that petitioned the Village of Mackinac Island to ban the automobile as the "horseless carriage" startled the horses. Descendants of the founding carriagemen still actively manage the company that was formed over 100 years ago.

Today, Mackinac Island Carriage Tours, Inc. is the world's largest, oldest and continually operated horse and buggy livery, with approximately 100 freight and passenger carriages put in motion by over 400 horses.
